MOLE DAY CELEBRATION

All students of the Department of Chemistry are hereby informed that **Mole Day** will be celebrated on **23 October 2026 at 11:00 AM** in the Department of Chemistry, VBRI, Udaipur.

All students are cordially invited to participate enthusiastically in the celebration and activities related to Mole Day to enhance their knowledge and interest in Chemistry.

Your active participation will make this celebration meaningful and enjoyable.

Dr Manish Kumar Rawal

REPORT ON MOLE DAY CELEBRATION

Department of Chemistry

Date: 23 October 2026

The Department of Chemistry, Vidya Bhawan Rural Institute (VBRI), Udaipur, celebrated Mole Day on 23 October 2026 with great enthusiasm and active participation from students.

Dr. Rehana Khanam conducted the programme and explained why Mole Day is celebrated every year on 23 October, from 6:02 a.m. to 6:02 p.m., symbolically representing Avogadro's number, (6.022×10^{23}). Mole Day aims to promote interest in chemistry, particularly in the mole concept, which is fundamental to understanding the quantity of atoms, molecules, and other particles in chemical substances. She highlighted its significance in making chemistry more engaging, enjoyable, and relatable through interesting scientific examples. She also emphasized the importance of understanding fundamental chemical concepts through practical applications and innovative learning activities.

Dr. Manish Kumar Rawal explained the concept and significance of the mole in chemistry. He illustrated the enormous magnitude of Avogadro's number through interesting scientific examples. He explained that one mole of marble sheets, if stacked together, could cover the Earth to a height of approximately three miles. He further explained that if a computer could count one atom per second continuously, it would take an extraordinarily long time to count all the atoms in one mole. These examples helped students appreciate the immense scale of Avogadro's number and understand the importance of the mole concept in chemistry.

Dr. Saba Khan presided over the programme. In her presidential address, she informed students about various career opportunities in chemistry, including higher education, research, teaching,

and industrial applications. She encouraged students to explore the diverse professional opportunities available in the field and to pursue their academic goals with dedication.

A total of 23 students participated in the programme with great enthusiasm and interest. The celebration provided an opportunity to enhance their scientific understanding, appreciate the importance of chemistry, and develop a deeper interest in the subject.

The programme concluded on a positive note, fulfilling its objective of promoting scientific awareness and encouraging students to explore the fascinating world of chemistry.
